sappi

Second quarter results

“Sappi is a leading global provider of powerful everyday materials made from woodfibre-based renewable resources. Together with our partners, we are quickly moving toward a more circular economy.”

Our raw material offerings (such as dissolving pulp, wood pulp and biomaterials) and end-use products (packaging and specialities papers, graphic papers, casting and release papers and forestry products) are manufactured from woodfibre sourced from sustainably managed forests and plantations, in production facilities powered, in many cases, with bio-energy from steam and existing waste streams. Many of our operations are energy self-sufficient.

Sappi works to build a thriving world by acting boldly to support the planet, people and prosperity.

⁽³⁾ Refer to supplemental information for the definition of the term.

⁽⁴⁾ The current covenant suspension period ends in September 2021.

Commentary on the quarter

The steady recovery from the ongoing challenges of the Covid-19 pandemic continued during the second quarter. A strong packaging and specialities performance combined with solid results from dissolving pulp (DP) offset the weak demand and margin squeeze in graphic paper. Consequently, group EBITDA excluding special items of US\$112 million was a further increase on the US\$98 million achieved in the first quarter. The North American and South African regions recorded improvements in profitability. This was in contrast to Europe where extended lockdowns and restrictions on economic activity hindered the performance. Logistics issues across all regions, including congested networks, shipping line schedule disruptions, lack of containers and vessel space constraints negatively impacted sales volumes and delivery costs in a number of product categories.

Our comprehensive Covid-19 action plan is fully entrenched in all of our operations and employee safety remains a top priority. The rate of employee and contractor infections reduced significantly during the quarter across all regions and as a consequence there was minimal impact on mill operations.

A positive highlight for the quarter was the continued rapid recovery of DP markets. The Chinese market price surged by US\$340 per ton during the quarter to US\$1,066 per ton and peaked in April to the highest level since May 2012. The key factors supporting the positive sentiment in the sector include

continued tight DP supply, low VSF inventory levels throughout the textile value chain, improved apparel retail demand in the US and Asia which favourably impacted all textile fibre prices, higher paper pulp prices and a continued weaker US\$/Renminbi exchange rate. Due to the lag impact of selling prices incorporated into our major contracts, these higher DP prices will only be realised in future quarters. A relative increase in costs related to the stronger ZAR/US\$ exchange rate partially offset the US Dollar selling price gains during the quarter. Included in the DP segment were 57,000 tons of bleached chemi-thermo mechanical pulp (BCTMP) and paper pulp sales volumes.

Sales volumes in the packaging and specialities segment increased by 25% compared to last year due to a further ramp-up of board products in North America and strong containerboard demand in South Africa. While demand for most categories in Europe was positive, some non-essential products were affected by Covid-19-related lockdowns. Profitability in Europe was partially reduced by lower selling prices.

The steady rate of recovery in graphic paper demand over the last two quarters slowed and sales volumes in the segment were 17% lower than the same quarter last year. Market capacity closures enabled Sappi to gain market share but the pressure on input costs, particularly pulp, and rising delivery charges impacted profitability negatively.

Earnings per share excluding special items for the quarter was a loss of 1 US cent, a decrease from the 4 US cents generated in the equivalent quarter last year.

Cash flow and debt

Capital expenditure of US\$70 million was comparable to the equivalent quarter of last year. Net cash utilised for the quarter was US\$53 million compared to a breakeven in the equivalent quarter last year and was primarily due to an increase in working capital from improving operations. Net debt increased by only US\$14 million from December 2020 to US\$2,070 million, benefiting from a stronger US Dollar which reduced the Euro denominated debt converted at a lower rate. Liquidity comprised cash on hand of US\$350 million and US\$660 million available from the undrawn committed revolving credit facilities (RCF) in South Africa and Europe.

Favourable market conditions provided the group with the opportunity to refinance the €350 million 2023 bonds during the quarter at par. Strong investor demand provided the opportunity to upsize the replacement 2028 bond to €400 million at a coupon 3.625%, with the additional proceeds used to repay the partly drawn RCF in Europe.

The net finance costs of US\$46 million included a further non-cash fair value adjustment of US\$16 million arising from the revaluation of the conversion rights for the Sappi Southern Africa R1.8 billion convertible bonds issued in the first quarter. The requirement for revaluations is applicable to the period between the bond placement and shareholder approval for the issue of new shares, which was obtained at the AGM in February, and therefore no further revaluation adjustments will be required. Also included in the finance costs was US\$3 million relating to the refinancing of the 2023 bonds.

The covenant suspension period ends in September 2021 and financial covenants have to be measured again from December 2021. The following leverage covenants (net debt:EBITDA) have been agreed with our banking group as we exit the covenant suspension period: December 2021: 5.50; March 2022: 5.25; June 2022: 4.75; September and December 2022: 4.50 and March 2023: 4.25. The interest coverage covenant will be reinstated at its previous level of 2.50 times.

Operating review for the quarter

Europe

EUR million	Mar 2021	Quarter ended			
		Dec 2020	Sept 2020	Jun 2020	Mar 2020
Sales – tons	669	658	570	540	793
Sales	483	482	422	420	606
Operating profit (loss) excluding special items	(8)	–	(19)	(32)	25
<i>Operating profit (loss) excluding special items to sales (%)</i>	<i>(1.7)</i>	–	<i>(4.5)</i>	<i>(7.6)</i>	<i>4.1</i>
EBITDA excluding special items	23	29	13	(1)	54
<i>EBITDA excluding special items to sales (%)</i>	<i>4.8</i>	<i>6.0</i>	<i>3.1</i>	<i>(0.2)</i>	<i>8.9</i>
RONOA <i>pa (%)</i>	<i>(2.5)</i>	–	<i>(5.8)</i>	<i>(9.5)</i>	<i>7.2</i>

Recovery in Europe slowed during the quarter due to renewed Covid-19 lockdowns. Sales volumes were 2% up on the prior quarter but 16% down relative to last year. The region was forced to take commercial downtime in the graphic paper segment of 115,000 tons, which was slightly below the 125,000 tons in the prior quarter. Demand from export markets improved but ongoing logistics issues, which were further exacerbated by the Suez Canal blockage in March, continue to severely limit our ability to serve these markets. Paper selling prices were also under pressure due to historically low paper pulp prices.

Demand for coated woodfree and coated mechanical papers remained weak with our sales volumes declining 18% and 20% respectively compared to last year. Price increases were announced across all European domestic and export graphic paper grades to counter rising input costs, particularly pulp.

Performance in the packaging and specialities segment was mixed. Paperboard demand was strong but some products in non-essential categories were negatively affected by Covid-19.

Increased costs relative to the prior quarter were primarily due to rising purchased pulp prices.

North America

US\$ million	Mar 2021	Quarter ended			
		Dec 2020	Sept 2020	Jun 2020	Mar 2020
Sales – tons	426	421	416	307	416
Sales	408	384	361	267	387
Operating profit (loss) excluding special items	11	(2)	–	(32)	4
<i>Operating profit (loss) excluding special items to sales (%)</i>	2.7	(0.5)	–	(12.0)	1.0
EBITDA excluding special items	35	27	30	(7)	31
<i>EBITDA excluding special items to sales (%)</i>	8.6	7.0	8.3	(2.6)	8.0
<i>RONOA pa (%)</i>	3.3	(0.6)	–	(9.5)	1.2

Strong sales volumes in the packaging and specialities segment and improved DP selling prices enabled the region to build on its performance in the first quarter to achieve an EBITDA of US\$35 million, which was an improvement on both the prior quarter and the equivalent quarter last year.

The recovery from the impact of Covid-19 in the graphics segment continued and sales volumes were 85% of last year. The market decline is estimated to be 25% but we benefited from industry capacity closures and gained substantial market share. No commercial downtime was required due to the transition towards packaging products at Somerset Mill.

The packaging and specialities segment volumes grew 56% year-on-year and 18% compared to the prior quarter. The ramp-up of paperboard grades at Somerset and strong demand in label paper facilitated the growth.

Higher selling prices for DP and BCTMP significantly improved profitability of the DP segment. Sales volumes in the quarter were negatively impacted by global logistical challenges.

Fixed costs were flat year-on-year, but variable costs were negatively impacted by an increase in delivery costs due to logistics issues as well as higher purchased pulp prices.

Operating review for the quarter *continued*

South Africa

ZAR million	Mar 2021	Quarter ended			
		Dec 2020	Sept 2020	Jun 2020	Mar 2020
Sales – tons	744	604	707	515	683
Sales	4,743	3,489	4,202	3,650	4,223
Operating profit excluding special items	438	267	306	266	321
<i>Operating profit excluding special items to sales (%)</i>	9.2	7.7	7.3	7.3	7.6
EBITDA excluding special items	707	550	644	562	626
<i>EBITDA excluding special items to sales (%)</i>	14.9	15.8	15.3	15.4	14.8
RONOA <i>pa (%)</i>	6.6	4.1	4.8	4.2	5.2

The South African business delivered an improved performance with a 13% year-on-year increase in EBITDA. Higher sales volumes in packaging and improved DP selling prices were the main positive factors. The stronger ZAR/US\$ exchange rate partially offset the benefit from the US\$ price increases in the DP segment.

DP sales volumes were 37% higher than the prior quarter due in part to the spill-over of shipments, which were delayed due to logistics issues. Sales volumes in the second quarter were constrained by those same logistical challenges and DP production curtailment of 23,000 tons at Ngodwana Mill due to the oxygen supply issues.

Packaging sales volumes increased by 28% year-on-year driven by a strong demand in the agriculture sector for fruit exports. Covid-19 had a negative impact on sales for the other paper categories.

Fixed and variable costs were 4% and 2% higher respectively than a year ago due to rising raw material costs and wage increases. Logistics issues, specifically shipping line schedule disruptions and vessel space constraints necessitated the use of alternate carriers at higher freight rates to secure deliveries.

DP market indicators remain positive and demand from our customers currently exceeds our capacity. As at 30 April 2021, the Chinese DP market price was US\$1,100 per ton. However, pricing for VSF and other textile fibres has reduced in recent weeks. Much of the benefit from the material recovery of DP prices in the second quarter will be realised in subsequent quarters due to the lag in contractual pricing. A prolonged stronger ZAR/US\$ exchange rate will temper some of the pricing benefits for the South African DP segment.

The underlying demand in the packaging and specialities segment in North America and South Africa remains robust and our focus is shifting to improving margins through machine efficiencies, mix optimisation and price realisation. However, as long as there is uncertainty in Europe regarding the continuing lockdowns due to Covid-19, the sluggish economic activity in this region is expected to impact demand for non-essential consumer products.

Graphic paper markets remain challenging and demand is still well below the long term pre-Covid-19 trend levels. The persistent weak demand in Europe is likely to keep the market in oversupply and diminish pricing power. The lag in sales price increase realisation in combination with rising raw material and logistics costs could exacerbate the margin squeeze even further in that region.

Ongoing worldwide logistical challenges of container shortages, port congestion and availability of vessel capacity pose a risk to export volumes from all regions in the third quarter.

Capital expenditure in FY2021 is estimated to be US\$400 million and the Saiccor Mill expansion project is expected to commence production in the fourth quarter. Liquidity headroom within the group is good. The successful reinstatement of our leverage covenants as described earlier provides a comfortable level of headroom when covenant measurement commences again from December 2021.

Given the favourable market conditions for DP and packaging and specialities, offset partially by the weak graphic paper demand and global logistical challenges, we expect the third quarter EBITDA to improve relative to the second quarter. However, earnings in the European business will be lower due to rising pulp costs.

On behalf of the board

Forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions, which are predictions of or indicate future events and future trends and which do not relate to historical matters, identify forward-looking statements. In addition, this document includes forward-looking statements relating to our potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. You should not rely on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond our control and may cause our actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- the Covid-19 pandemic;

- the impact on our business of adverse changes in global economic conditions;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for our products;
- the emergence of new technologies and changes in consumer trends including increased preferences for digital media;
- consequences of our leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems;
- the impact of restructurings, investments, acquisitions, dispositions and other strategic initiatives (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions or implementing restructurings or other strategic initiatives, and achieving expected savings and synergies;
- currency fluctuations.

We undertake no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

1. Basis of preparation

The condensed consolidated interim financial statements for the quarter and half-year ended March 2021 are prepared in accordance with the International Financial Reporting Standards, IAS 34 *Interim Financial Reporting*, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by Financial Reporting Standards Council and the requirements of the Companies Act of South Africa. The accounting policies applied in the preparation of these interim financial statements are in terms of International Financial Reporting Standards as issued by the IASB and are consistent with those applied in the previous annual financial statements.

The preparation of these condensed consolidated financial statements was supervised by the Chief Financial Officer, G T Pearce, CA(SA) and were authorised for issue on 6 May 2021.

The condensed consolidated financial statements for the half-year ended March 2021 have been reviewed by KPMG Inc., who expressed an unmodified review conclusion. The auditor's report does not necessarily report on all of the information contained in these financial results. Shareholders are therefore advised that in order to obtain a full understanding of the nature of the auditor's engagement they should obtain a copy of the auditor's report, together with the accompanying financial information, from the issuer's registered office. Any reference to future financial performance included in this announcement, has not been reviewed or reported on by the company's auditors.

Going concern

The group incurred a loss of US\$40 million for the half-year ended March 2021 (2020: Profit of US\$26 million) which includes a fair value loss of US\$29 million relating to the financial instruments (refer note 8). The group's performance for the half year was adversely impacted by the continued Covid-19 pandemic and the economic after-effect. The group has agreed a covenant suspension period for the measurement of the financial covenants applicable to its debt facilities until September 2021 with the first measurement due at the end of December 2021. Revised leverage covenants (net debt: EBITDA) have also been agreed with the group's banking group when the covenant suspension period is exited. The impact of Covid-19 on its results and future covenant compliance are continuously assessed and monitored by the group.

As a result, the group continues to focus on the preservation of liquidity and cash flow, and implement various cost saving measures across all operations, curtail excess production and where possible defer non-essential capital expenditure and apply measures to optimise working capital. The directors have reviewed the group's financial position, existing borrowing facilities and cash on hand, and are satisfied that the group will continue as a going concern for the foreseeable future.

Earnings excluding special items	(4)	24	(10)	54

⁽¹⁾ The effects of anti-dilutive potential ordinary shares are ignored in the calculation of diluted earnings per share and diluted headline earnings per share.

5. Plantations

Plantations are stated at fair value less cost to sell at the harvesting stage. In arriving at plantation fair values, the key assumptions are market prices less cost of delivery, discount rates and volume and growth estimations.

Mature timber that is expected to be felled within 12 months from the end of the reporting period is valued using unadjusted current market prices. Mature timber that is to be felled in more than 12 months from the reporting date is valued using a 12 quarter rolling historical average price. Immature timber is valued using a discounted cash flow method taking into account the growth cycle of a plantation.

The fair value of plantations is a Level 3 measure in terms of the fair value measurement hierarchy as established by IFRS 13 *Fair Value Measurement*.

US\$ million	Reviewed	
	Mar 2021	Sept 2020
Fair value of plantations at beginning of year	419	451
Additions	–	2
Gains arising from growth	38	72
Fire, flood, storm and other events	(1)	(11)
In-field inventory	–	1
Gain arising from fair value price changes	3	20
Harvesting – agriculture produce (fellings)	(35)	(63)
Translation difference	62	(53)
Fair value of plantations at end of period	486	419

6. Financial instruments

The group's financial instruments that are measured at fair value on a recurring basis consist of derivative financial instruments and investments funds. These have been categorised in terms of the fair value measurement hierarchy as established by IFRS 13 *Fair Value Measurement* per the table below.

US\$ million	Classification	Fair value hierarchy	Fair value ⁽¹⁾ Reviewed	
			Mar 2021	Sept 2020
Investment funds ⁽²⁾	FV through OCI	Level 1	6	6
Derivative financial assets	FV through PL	Level 2	3	3
Derivative financial liabilities	FV through PL	Level 2	13	11

⁽¹⁾ *The fair value of the financial instruments are equal to their carrying value.*

⁽²⁾ *Included in other non-current assets.*

There have been no transfers of financial assets or financial liabilities between the categories of the fair value hierarchy.

The fair value of all external over-the-counter derivatives is calculated based on the discount rate adjustment technique. The discount rate used is derived from observable rates of return for comparable assets or liabilities traded in the market. The credit risk of the external counterparty is incorporated into the calculation of fair values of financial assets and own credit risk is incorporated in the measurement of financial liabilities. The change in fair value is therefore impacted by the following inputs, the movement of the interest rate curves, by the volatility of the applied credit spreads, and by any changes to the credit profile of the involved parties.

There are no financial assets and liabilities that have been remeasured to fair value on a non-recurring basis.

The carrying amounts of other financial instruments which include cash and cash equivalents, trade and other receivables, certain investments, trade and other payables and current interest-bearing borrowings approximate their fair values.

7. Capital commitments

US\$ million	Reviewed	
	Mar 2021	Sept 2020
Contracted	143	89
Approved but not contracted	135	232
	278	321

8. Material balance sheet movements

Since the 2020 financial year-end, the ZAR has strengthened by approximately 15% against the US Dollar, the group's presentation currency. This has resulted in a similar increase of the group's South African assets and liabilities and equity, which are held in the aforementioned functional currency, on translation to the presentation currency at period end.

Cash and non-current interest-bearing borrowings and derivative liabilities

On 25 November 2020, Sappi Southern Africa Limited, a wholly owned subsidiary of Sappi Limited, issued ZAR1.8 billion (US\$123 million) senior, unsecured, convertible bonds due in 2025. The bonds were issued at par and carry a fixed term interest rate coupon of 5.25% per annum. The initial conversion price of ZAR33.16 was set at a premium of 32.5% above the reference share price of ZAR25.03. A derivative liability for the conversion option was initially recognised at ZAR321 million (US\$22 million) and was subsequently revalued to US\$51 million at the date of shareholder approval with US\$29 million recognised in profit or loss as finance costs for the six months ended March 2021. Following shareholder approval, the derivative liability met the definition of equity and was reclassified to equity, net of tax and will not be revalued any further. Interest-bearing borrowings increased by ZAR1,479 million (US\$101 million), which excludes the derivative liability, following the issuance of the convertible bond.

During the quarter the group raised an aggregate principal amount of €400 million (US\$472 million) in new senior unsecured notes due 2028 at a coupon of 3.625% per annum. The proceeds from these notes were used to redeem the full amount of the group's €350 million senior (US\$413 million) unsecured notes due 2023 as the group exercised its option to early redeem these notes. In addition to the convertible bond and the new senior unsecured notes, the group utilised and repaid amounts on its available borrowing facilities during the six-month period.

Inventories, trade and other receivables and trade and other payables

The increase in inventories, trade and other receivables and trade and other payables is largely attributable to seasonal working capital movements.

Other non-current assets and liabilities

The group remeasured its post-employment benefit funds as at March 2021 resulting in actuarial gains of US\$100 million.

9. Related parties

There has been no material change, by nature or amount, in transactions with related parties since the 2020 financial year-end.

10. Events after balance sheet date

There have been no reportable events that occurred between the balance sheet date and the date of authorisation for issue of these financial statements.

11. Accounting standards, interpretations and amendments to existing standards that are not yet effective

There has been no significant change to managements estimates in respect of new accounting standards, amendments and interpretation to existing standards that have been published which are not yet effective and which have not yet been adopted by the group.

Supplemental information

(this information has not been audited or reviewed)

General definitions

Average – averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

Capital employed – shareholders' equity plus net debt

Covenant leverage ratio – net debt divided by last 12 months EBITDA excluding special items as defined by our bank covenants

EBITDA excluding special items – earnings before interest (net finance costs), taxation, depreciation, amortisation and special items

EPS excluding special items – earnings per share excluding special items and certain once-off finance and tax items

Fellings – the amount charged against the income statement representing the standing value of the plantations harvested

Headline earnings – as defined in circular 1/2019, issued by the South African Institute of Chartered Accountants in December 2019, which separates from earnings all separately identifiable remeasurements. It is not necessarily a measure of sustainable earnings

It is a Listings Requirement of the JSE Limited to disclose headline earnings per share

Interest cover – last 12 months EBITDA excluding special items to net interest adjusted for refinancing costs

NBSK – Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, produced from coniferous trees (ie spruce, pine) in Scandinavia, Canada and northern USA. The price of NBSK is a benchmark widely used in the pulp and paper industry for comparative purposes

Net assets – total assets less total liabilities

Net asset value per share – net assets divided by the number of shares in issue at balance sheet date

Net debt – current and non-current interest-bearing borrowings and lease liabilities, bank overdrafts less cash and cash equivalents

Net debt to EBITDA excluding special items – net debt divided by the last 12 months EBITDA excluding special items

Net operating assets – total assets (excluding deferred tax assets and cash) less current liabilities (excluding interest-bearing borrowings, lease liabilities and overdraft)

Operating profit – a profit from business operations before deduction of net finance costs and taxes

Non-GAAP measures – the group believes that it is useful to report certain non-GAAP measures for the following reasons:

- these measures are used by the group for internal performance analysis
- the presentation by the group's reported business segments of these measures facilitates comparability with other companies in our industry, although the group's measures may not be comparable with similarly titled profit measurements reported by other companies
- it is useful in connection with discussion with the investment analyst community and debt rating agencies

These non-GAAP measures should not be considered in isolation or construed as a substitute for GAAP measures in accordance with IFRS

ROCE – annualised return on average capital employed. Operating profit excluding special items divided by average capital employed

RONOA – return on average net operating assets. Operating profit excluding special items divided by average net operating assets

Special items – special items cover those items which management believes are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash

The above financial measures are presented to assist our shareholders and the investment community in interpreting our financial results. These financial measures are regularly used and compared between companies in our industry.
