10 March 2020

Dear Customer

COVID-19 Update from Sappi Europe

Following up from our previous communication Sappi Europe is continuing to assess the impact of COVID-19 on our business and our operational environment as a whole.

As the intensity related to the virus seems to continue we have increased our vigilance to protect and maintain the safety of our people, sites and products.

All our European production sites and offices are working in accordance with local government guidelines to help reduce risk and maintain business as usual. Travel to and from all sites has been reduced in line with current advice and hygiene guidelines being followed.

As previously stated we have taken measures to ensure we are able to maintain as far as is possible our normal service levels. Our own paper stocks are sufficiently high together with critical raw material stocks. Our logistics teams have developed a dedicated COVID-19 taskforce which looks to continually adapt to situations across Europe where and when needed.

The recent additional measure taken by the Italian government have not impacted our Italian production sites, we are for now able to maintain business as usual with secured inbound and outbound logistics.

We will continue to communicate if and when we have a change of situation, but for now our approach is to continue in a safe and considered way.

Yours sincerely

Marco Eikelenboom
