

SAPPI PACKAGING PAPERS

Renewable. Reliable. *Ready* to take on your packaging needs.

At Sappi, you can expect a committed partnership and high-quality, sustainable products made in world-class facilities.

sappi

Sappi's global presence and expertise in the industry make us a reliable and sustainable business partner.

Financial strength

We've achieved our lowest debt level in 30 years, which has put us in a strong financial position for growth. We are a financially stable partner and ready to take on new opportunities.*

* Sappi FY2023 Annual Integrated Report

Reliable partnership

Our 17 production facilities are headquartered in three key regions: North America, South Africa and Europe. Partnering with Sappi means you have access to our well-established global brands and resources that span 150 countries.

Global innovation and support network

Sappi's global network of research-and-development facilities uses advanced technology to innovate products and solve customer challenges. With strategic support teams and dedicated sales and technical solutions teams, we serve as an extension of your business.

Containerboard

Our comprehensive range of containerboard products for topliner, fluting, and liner applications provides a complete solution for premium packaging and graphic application needs.

With their brilliant color reproduction, improved readability and superior strength, our products are designed to increase shelf impact and are suitable for consumer packaging, point-of-sale displays, club store packaging and more.

CONTAINERBOARD

Fusion Topliner	Lamination paper with silk-coated top side, reverse-side functional coating	Consumer packaging, POS displays, games and puzzle boxes, gift boxes	90–200gsm	Ehingen Mill Germany

Sappi North America invests in the future of sustainable paper packaging

Over the last decade, Sappi has strategically invested over $1 billion to improve operational efficiency, reduce waste and lower its carbon footprint, resulting in the expansion of its paperboard packaging production.

The latest initiative, Project Elevate, is a $418 million fully cash-funded capital investment aimed at converting Paper Machine 2 (PM2) at the Somerset Mill to produce solid bleached sulfate (SBS) board products, a renewable alternative to single-use plastics.

Both PM1 and PM2 will produce folding cartons and food-service boards, cups, plates, bowls and trays with an annual capacity of 920,000 tons a year.

Paperboard

Our premium paperboard solutions for packaging and graphic applications offer consistent performance in both printing and converting processes, as well as outstanding optical results for increased shelf impact.

Engineered to elevate your brand with vibrant, high-quality printability, ensuring impactful shelf presence. Ideal for a wide range of folding carton applications, they offer a reliability and brilliance required for health and beauty, personal care, pharmaceuticals, dry and frozen food packaging, and toys and games.

PAPERBOARD

BRAND	DESCRIPTION	END USES	PRODUCT RANGE	MFG. LOCATION

LusterFSB	Coated one-side SBS paperboard optimized for food service packaging	Food-service packaging, paper plates, paper bowls, paper cups, trays and scoops	10–24pt	Somerset Mill Maine, USA

Flexible Packaging

Our flexible packaging papers offer a superior surface that sets us apart in the market.

Available in both coated and uncoated options, with matte and gloss finishes, they are the perfect fit for food and nonfood packaging applications, such as sachets, flow wraps, pouches, tea envelopes, cigarette innerliners and softpacks.

As a market and innovation leader, we also offer a wide array of flexible packaging papers with barrier and heat-sealing functionality. Integrated barriers against oxygen, water vapor, grease, and mineral oil mean that there is no need to apply additional coatings to achieve a paper-based packaging solution.

FLEXIBLE PACKAGING

BRAND	DESCRIPTION	END USES	PRODUCT RANGE	MFG. LOCATION
Algro Finess	One-side double-coated, high glossy MGBK	Various flexible packaging	40–120 g/m²	Alfeld Mill Germany

CDP
DISCLOSURE INSIGHT ACTION

CDP

Sappi's continued high CDP score demonstrates our ongoing commitment to environmental leadership in climate change, water security and deforestation.

A-

CDP Climate
A strong rating above the global average, both within our sector and overall.

A-

CDP Forests
A leadership-level rating for our forest stewardship practices globally.

B

CDP Water
First submission to CDP water for important benchmarking.

SCIENCE BASED TARGETS
DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Science Based Targets

Sappi has joined thousands of other companies to battle climate change. In 2022, we received approval for our SBTi targets and goals to reduce greenhouse gas (GHG) emissions by 2030.

The Science Based Targets initiative is a collaboration between CDP, the United Nations Global Compact, World Resources Institute (WRI) and the World Wide Fund for Nature (WWF).
